

# Non-Exclusive Magnetic Survey

Survey ID: MV-A19

Athabasca Field, Canada

| MV-A19 Alberta Oil Sands Survey Parameters |                         |                          |                                  |
|--------------------------------------------|-------------------------|--------------------------|----------------------------------|
| Type:                                      | Aeromagnetic            | Line Miles:              | 14,349                           |
| Survey Identifier:                         | MV-A19                  | Line Kilometers:         | 23,093                           |
| Survey Location:                           | Athabasca Field, Canada | Line/Tie-line Spacing:   | 1 x 4 km grid & 0.25 x 1 km grid |
| Date Flown:                                | Nov 2014 – Feb 2015     | Line/Tie-line Direction: | E-W/N-S                          |
| Flight Altitude:                           | 125 m Drape             | Flown By:                | Sander Geophysics Ltd.           |
